

# XL INDUSTRIAL RESINS (UK) LTD

**RESIN SURFACE APPLICATIONS  
FOR INDUSTRY**

**XL industrial Resins (UK) Ltd** are a resin flooring contractor based in Central Scotland. XL's management and staff have over 60 years combined experience in resin flooring application and the company has grown from strength to strength in recent years, developing a strong client base throughout the United Kingdom.

We have successfully undertaken projects within the Electronics, Food and Drinks, Pharmaceutical and Automotive Industries, in addition to various other industries.

These projects have been carried out for both main contractors and end user clients who rely on us to provide competitive prices, excellent workmanship, a high level of flexibility and minimal disruption throughout the application process.

We strive as a company to perform to the highest standard, utilising both our experience and innovative resin flooring application techniques and products to provide the most suitable and cost effective solution for the project. As a company we pride ourselves on providing a complete service to our clients, offering a full service from start to finish.

## Our Services

We are approved contractors with Flowcrete, Altro, Resin Surfaces, BASF, Resdev, Ronacrete and many others.

We offer the following areas of flooring works:

- Screeding
- Epoxy Coatings
- Chemical Resistant
- Steam Cleanable
- Hygienic Finish
- Slip Resistant
- Anti Static
- Polyurethane Flooring
- Methyl Methacrylate (MMA)
- Decorative

## What is a Resin Floor?

Resin floors are produced onsite by the chemical interaction between two polymers to form a tough chemical resistant finish, which is stronger than concrete. Resin floors are unique in the way they combine with the concrete base to form one continuous layer. The resins are absorbed into the concrete and continue their chemical interaction below the surface. Providing the concrete is prepared properly it becomes impossible to separate the resin layer from the concrete base.

## What does a Resin Floor Cost?

The cost of resin flooring consists of three main elements; the material used, the type and thoroughness of sub floor preparation and the labour involved. The right combination of all three elements is essential for consistently successful applications. We have introduced a unique concept to combine these essential elements to ensure a satisfactory installation for our clients.

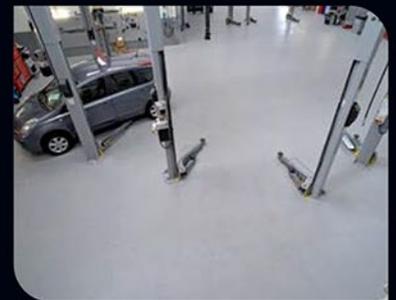

## Why Choose Resin?

Resin flooring systems offer a seamless, impervious and easily cleaned floor finish that will not harbor bacteria.

These inherent properties have made resin flooring an economical and practical flooring solution for many industries. Resin flooring solutions are the finish of choice in a wide range of industries, including;

- Automotive
- Aerospace
- Brewing
- Chemical
- Cosmetics
- Defence
- Distribution
- Electronics
- Engineering
- Food
- Logistics
- Nuclear
- Offshore
- Paper
- Pharmaceutical
- Printing
- Prison
- Power
- Retail
- Textile
- Water

Our staff and workforce have over 60 combined years experience of working within the resin flooring industry. Carrying out installations in all the above environments.
